Pacific Coachworks, Inc. reports successful launch of new products

Pacific Coachworks' recent launch of "KSO" (Kitchen Slide-Out) Tango travel trailers exceeded company expectations and was arguably the most talked about innovation at the 2009 National RV Trade Show.

"Dealers saw a huge opportunity to purchase a unique product that is sure to draw lots of retail attention during their spring show season" said company president, Dane Found.

The Kitchen Slide-Out option is available on eight Tango travel trailer models ranging from 26' – 34' in length. It will also be offered on 2560RBSS and 2790BHSS fifth wheel models.

The outdoor kitchen concept is becoming more and more popular with customers simply because it reinforces the consumer's desire to spend time outdoors with family. Tango's *Patent Pending* slide-out design can be incorporated into many more floor plans and sizes than side-mount kitchens currently offered by other manufacturers.

In addition to Tango “KSO” models, Pacific Coachworks launched a new line of Toy Hauler travel trailers. The TURBO received a huge thumbs-up from dealers for its outstanding quality and creative design.

The 285KS displayed at Louisville featured a king size bed slide out extending 49” on the roadside of the unit. The huge front bedroom featured exceptional change room space and storage. Pacific Coachworks CEO Tom Powell said that “with the departure of several west coast toy hauler manufacturers, we saw a void in the segment for a quality-built toy hauler.
